

Your Child Care Health Consultant is here to help!

Child Care Health Consultants (CCHCs) work with early care and education facilities to improve the health and safety of their programs.

Get in touch with me for:

- Technical Assistance
- Materials and Resources
- Training and Professional Development
- Support with Policies and Procedures
- Health and Safety Assessments
- Connections to Community Resources

CCHC's offer support on these health and safety topics and more:

Illness and Infectious Diseases

Environmental Health

Children with Special Health Care Needs

Medication Administration

Emergency Preparedness, Response, Recovery

Physical Activity, Nutrition, and Breastfeeding

The NC Resource Center's mission is to promote healthy and safe indoor and outdoor environments in early care and education (ECE) settings through child care health consultation.

Frequently Asked Questions (FAQ's)

When a child or teacher in my program is sick, how long should they stay home to keep everyone safe?

Every disease is different depending on how it spreads and how easily it spreads. We have a quick and easy, searchable guide to help you figure out next steps for common childhood diseases: <https://healthychildcare.unc.edu/resources/communicable-disease-resources/exclusion/>

A CCHC can help you develop a policy and assess and improve practices.

For COVID-19 guidance, go to: <https://www.cdc.gov/coronavirus/2019-ncov/your-health/isolation.html>

Community Resources

Healthcare Providers and the county **Health Department** can:

- give vaccinations
- diagnose, provide medications and care

Call the health department with cases of reportable diseases.

- Find out which diseases are reportable here: <https://healthychildcare.unc.edu/resources/communicable-disease-resources/reportable-diseases/>
- Report cases your local health department's, Communicable Disease Nurse and your licensing consultant know.

I have an ITERS/ECERS coming up...Can you help?

Yes! A CCHC can help you assess practices and environments related health and safety. ITERS/ECERS subscales on which a CCHC can provide support include: meals/snacks, nap/rest, toileting/diapering, health practices, safety practices, active play/gross motor equipment/play, and supervision of gross motor activities.

Can you help my program accommodate a child with special healthcare needs?

Yes! A CCHC can help support you with serving children with medical, medication, communication, and physical access needs. A nurse from the child's healthcare provider or the health department may also be able to help. Together with the child's family, we can work to meet their needs and help the child thrive.

Have questions? Looking for health or safety TA or training? Contact Alicia!
