Note: we are currently in the process of addressing concerns we have heard from CCHCs since the tool went live in July of 2021. This includes revising indicator language and addressing the length of our two longest sections (1 and 4). To integrate these changes to the system, the tool will be down the week of July 3rd. **All NC HSAET assessments and encounters will need to be finalized and closed by 6/30/23 this year. This means any assessments that are in progress (only the initial completed) will need to have a follow up assessment completed before 6/30/23.**
